RE: Walk through History

The Grand Valley Library is excited to present a Walk through History at 7:30 p.m. on Wednesday April 25 at the library. Local artist Donna Pascoe, who has been involved in many community projects such as the statue of Orange Lawrence, developed the concept, researched and painted the timeline spanning a period millions of years B.C. to the present.

The mural includes images representative of significant eras in history including prehistoric dinosaurs, Greek and Egyptian civilizations, Mayans and modern day technology. Donna will be walking us through her renderings of this original work of art.

The project was financed through a donation from John Pennie of Windrush Energy. Mr. Pennie is involved in the development of a small wind farm at Ashton Ridge Golf Course and surrounding properties and has been very involved in other community projects. Everyone is welcome to attend.

Photo ops are available by appointment.
